Subject: Sediment Coring FSP - Response to Comments

Davis,

Attached is the Response to Comments (RTC) for the Sediment Coring FSP.

In an earlier email you suggested that the need for a technical call would be determined at a later date, so please keep me informed.

We understand the ASAO required due date is March 23 and we are prepared to meet that schedule. However, based upon your review of the RTC (attached) you might chose to have a technical call and that might require an extension to the due date.
